

DOOR COLLECTION 2022

Welcome

Our 2022 Door Collection includes all the designs you've come to know and trust, plus some exciting new door styles too!

Our incredibly popular Urban Industrial range has expanded (p16-25), thanks to its uber-contemporary style, robust construction and value for money. Whether you choose them in black or white, the new Civic and Plaza door designs are perfect for the modern home.

If you're looking for something a little different our striking new Quartz design (p95) really does have the wow factor - or keep things modern and simple with our new 4 Line Horizontal (p105).

Whatever your style and budget, from space-saving pocket door systems to easy-to-maintain Laminate doors, we'll have the door solution to suit your needs.

This brochure has clickable links to help you find what you want quicker!

Architects, Specifiers and Designers

Our dynamic door designs offer undeniable value as well as compliance with a wide range of UK and European industry standards.

From fire protection and thermal insulation to renewable resources and disabled access, you can rely on JB Kind to provide the quality standards you need. We have recognised third party accreditation from schemes such as Certifire and FSC® chain of custody.

If you have any questions or need some expert advice, don't hesitate to call us on 01283 554197.

What's new for 2022?

Two new styles added to Urban Industrial

Industrial style inspired interiors are the latest go to trend in home design. Linking functional industrial elements with comfortable modern living to create the perfect home!

Our Urban Industrial range has seen unprecedented demand which is why we've added 8 new design options to this uber-contemporary door collection.

The new 6 panel Civic and 10 panel Plaza designs, like our existing industrial interior doors, benefit from robust quality construction and are available pre-finished in both black and white. See pages 18-21.

www.jbkind.com

4 Line Horizontal

We've kept it simple with our new 4 Line Horizontal door.

Its contemporary style offers an excellent quality, entry level smooth moulded skin door. Primed and ready for painting with matching glazed and FD30 fire door options too. See page 105.

Chic and creative – the Quartz!

The Quartz's striking hexagonal design oozes complex creativity with a classy yet laid back labyrinthian design.

Choose from solid and glazed options that are ready primed, waiting for your choice of paint finish. See page 95.

Inspiration Hub

Our new online Inspiration Hub is the perfect place to help inspire your door choice and spark some creativity!

There are real life case studies, customer inspired project images, a large lifestyle gallery as well as the latest trends and tips.

We've a rich heritage in timber products

Like to know more about our history?
Visit jbkind.com/about/history

Today, we offer more than just doors

At our purpose built head office and distribution centre in Derbyshire, we offer a number of different door related products and services.

Whether you require tailor made bespoke doors in a different design or size, pre-assembled internal doorsets or a professional spray paint finish service in any colour you like - we can help.

Space saving pocket door systems that are easy to install and an attractive selection of handle packs that include everything you need to fit a door, are also available.

In-house Joinery service

Our team of experienced joiners offer a range of services related to door installation. These include, glazing FD30 fire doors and rebating doors into pairs.

Over 150 years and we're still going strong!

JB Kind's business has always diversified and moved with the times, including manufacturing goods for the military during both World Wars and more recently timber pallets.

In 1983, JB Kind introduced a new line of business, a door division! Offering a new and innovative approach to supplying affordable, quality door designs proved so successful, the business turned exclusively to doors in 2007 and we haven't looked back since!

Certifications & Memberships

Our dedication to meeting the highest standards for our customers is illustrated by our continuous achievement of the UK quality standard to the ISO9001 accreditation. In addition, we are affiliated to the British Woodworking Federation (BWF) and Timber Research and Development Association (TRADA) which together set the industry standards for the supply of wood products into the UK.

Look for FSC® certified products

FSC® Certified chain of custody door supplier

We hold our own FSC® chain of custody certification for certain doors within our collection. Chain of custody certification ensures that the systems within our business allow us to track the door from the day we buy it, through to the day we deliver it. Wherever you see FSC® Certified within a product description that door has been produced from certified materials and other controlled sources.

Get Inspired...

At our showroom we welcome visitors from across the UK to view the largest range of JB Kind doors in the country.

From architects and specifiers, to developers, self builders and renovators, we offer exclusive access to the showroom, Monday to Friday on an appointment only basis.

Based in Swadlincote, South Derbyshire, JB Kind's showroom is conveniently

located just 10 minutes from either junction 11 or 13 on the M42.

You will be able to view more than 70 doors on display from our latest and most popular door ranges, as well as a double pocket door system, a working bi-fold door and rebated door pair.

We have many partners throughout the UK with our doors on display, so please consult us for the closest to you or visit our online Supplier Locator.

Social media

Follow us on social media for inspirational ideas, news and much more.

Instagram - be inspired by #realhomes that have fitted our doors and don't forget to share photos of your projects by tagging us in at #jbkinddoors.

Did you know that we have lots of helpful product and 'how to' videos on YouTube?

Brochures, trends, help and more

Visit jbkind.com to find lots more information to help you make your door choices. Including information on finishes, sizes and the latest interior trends.

Plus, there are product focus brochures, FAQs, How to advice and videos and our bespoke services are all available for you to browse through.

View our brochures at jbkind.com/brochure

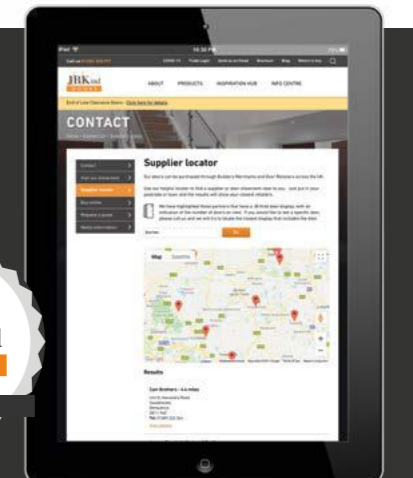

Ready to buy?

We don't sell doors direct, instead all our doors can be ordered from Builders Merchants and Door Retailer partners across the UK, as well as via our approved Online Partners.

Just go to the **Where to Buy** section on jbkind.com and search our Supplier Locator to find your closest retailer, as well as links to our Online Partners.

Find your nearest retailer at jbkind.com/about/where-to-buy

How to choose your doors

Measuring up

To make sure you purchase the right door sizes, take the following measurements.

Door width: measure the top, middle and bottom of the door frame. The widest measurement determines the width of the door.
Door height: measure inside the vertical side of the frame. The longest length determines the height required. Remember to make allowance for any floor covering and fitting tolerances (normally 2-3mm on long edges and top edge).

NB. You can plane door edges slightly to reduce the size. If required, please call us for details of the lipping size.

Door size conversion chart:

A little help if you need to work out the metric and imperial equivalent for door sizes.

Height & Width		
Metric (mm)	Imperial (inches)	Imperial (feet & inches)
1981 x 457	78" x 18"	6'6" x 1'6"
1981 x 533	78" x 21"	6'6" x 1'9"
1981 x 610	78" x 24"	6'6" x 2'0"
1981 x 686	78" x 27"	6'6" x 2'3"
1981 x 711	78" x 28"	6'6" x 2'4"
1981 x 762	78" x 30"	6'6" x 2'6"
1981 x 838	78" x 33"	6'6" x 2'9"
1981 x 915	78" x 36"	6'6" x 3'0"
1981 x 1067	78" x 42"	6'6" x 3'6"
1981 x 1168	78" x 46"	6'6" x 3'10"
1981 x 1220	78" x 48"	6'6" x 4'0"
1981 x 1372	78" x 54"	6'6" x 4'6"
1981 x 1524	78" x 60"	6'6" x 5'0"
2032 x 813	80" x 32"	6'8" x 2'8"
2134 x 915	84" x 36"	7'0" x 3'0"
2040 x 526	80¼" x 20 ¹¹ / ₁₆ "	6'8¼" x 1'8 ¹¹ / ₁₆ "
2040 x 626	80¼" x 24 ⁵ / ₈ "	6'8¼" x 2'0 ⁵ / ₈ "
2040 x 726	80¼" x 28 ⁵ / ₈ "	6'8¼" x 2'4 ⁵ / ₈ "
2040 x 826	80¼" x 32½"	6'8¼" x 2'8½"
2040 x 926	80¼" x 36 ⁷ / ₁₆ "	6'8¼" x 3'0 ⁷ / ₁₆ "

STEP 1

Choose your preferred door style

Browse through and select your favourite door designs, colours and finishes. Not forgetting, a matching glazed partner, should you wish to add some extra light.

STEP 2

Check the sizes available

If one of our standard door sizes does not fit your requirements, check if a special size can be ordered through our **Bs** Bespoke Options service, page 12.

STEP 3

Consider how the doors will be fitted

- Do you need any door pairs? If so, take a look at our Door Pair rebating service page 15.
- Would a Pocket Door System help create some extra space? Ideal for renovation and new build projects, see pages 110-113.
- Will you require any fire doors? Most of our door designs offer an FD30 fire door option. See below.
- Ensuites, wardrobes and cupboards often require a space saving solution. Consider a matching bi-fold option, pocket door system or invest in some sliding door tracking.

STEP 4

Pick the right handle

A stylish handle really does finish off a door. Take a look at our Door Handle Packs, pages 114-116, supplied with everything you need to fit a door.

STEP 5

Price up your doors

JB Kind's doors can be purchased through Builders Merchants and Door Retailer partners across the UK, any of which will be happy to provide a quote. Either call us on 01283 554197 for details of your local supplier or visit our online Supplier Locator at jbkind.com.

Alternatively you can Buy Online via one of our approved Online Partners and your doors will just be a click away.

Fire Doors

Fire doors are a serious business, and that's why we invest our time, energy and money to ensure that we have one of the most comprehensive, and certified, collections of fire doors in the UK.

As responsible suppliers of fire resistant doors, we ensure that all of our FD30 doors have been tested in accordance with either the British BS476 pt22 or European EN1634-1:2000 standards. All of our fire doors have a Fire Test Assessment report which is available upon request and outlines in detail exactly what you can and can't do when fitting any particular door. All fire doors are glazed with fire-rated glass.

FD30 fire door pairs: please note that not all FD30 fire doors offered within this brochure are certificated for use as pairs. Please contact us for more information.

For more information on fire doors, including details on Glazed Fire Doors & Part M (Mobility) visibility requirements, log on to jbkind.com or call **01283 554197**.

Finding your fire doors

Look out for the 🔥 or 💧 icons that are adjacent to product codes throughout the brochure.

For a more detailed breakdown of the fire door options by range. See our online 'At a Glance Guide' that shows the standard stock and bespoke options for both solid and glazed FD30 fire doors, at jbkind.com/info-centre/fire-doors

Certificated Fire Doors

Fire doors certificated by Warringtonfire are identified by 🔥 Certifire FD30 Fire door. JB Kind's membership of the BWF Fire Door Alliance Scheme supports the promotion of third party certification.

OUR SERVICES

Need to know more about any of our services or wish to order? Call 01283 554197 or email info@jbkind.com

BS Bespoke Options

Whether you're self-building, renovating your home, purchasing for a development project or you're an interior design expert, you'll want to take a look at JB Kind's bespoke options. The versatility of our bespoke service is ideal for those special requirements.

Many of our door designs have bespoke options available. Look out for the **BS** icon adjacent to product images.

Make your mark

Perhaps you love one of the designs from our Door Collection but would prefer it in a different timber veneer or painted finish, or maybe you would like to create a style that is completely unique and different?

 Head to our website for more info jbkind.com/products/bespoke-door-options

Made to measure

There are a wide range of standard door sizes available, however, sometimes you just cannot avoid an awkwardly sized door opening. Many of the doors from our collection can be produced to order as a special size.

Bespoke glazing

Whether you prefer a full glazed panel or smaller apertures, there are so many options for a glazed door. Clear, bevelled, diamond cut and etched are some of the most popular glazing types. Let us know what you would like to achieve and we'll advise on the options.

Fire doors

JB Kind can supply bespoke fire doors, in a wide range of solid and glazed options. Supported by the appropriate accreditations, you can be safe and stylish.

Canterbury, painted in RAL 7003 Moss Grey

Colour Options Paint Service

All the colours of the spectrum

Bring colour to your home and make a style statement by painting your doors any colour you like!

Painting doors can be fiddly and time consuming, so let us take the hassle away and arrange for your doors to be professionally spray painted prior to delivery. All you have to do is tell us your preferred RAL Classic colour and we will do the rest.

Our White Classic and White Moulded door ranges are suitable for this service – look out for the  icon as you browse through the brochure.

BENEFITS

Save time

No need to prepare (de-nib/sand) doors prior to painting and paint several coats on each side, allowing for drying time too!

Cost saving

Eliminate the cost of purchasing paint and equipment, plus labour if you employ someone to do the job for you.

Perfect finish

Spray painting gives a smooth factory finish without brush marks or uneven coverage.

Colour choice

You really can have any colour on the RAL Classic spectrum. Even if you would like to paint your doors a shade of white, we will ensure they have the perfect finish.

Most popular RAL colours

The RAL Classic colour chart offers many different shades, so you should be able to find your perfect hue. As a guide, here are some of our customers favourites and you'll see that shades with a grey undertone are currently very popular.

Note: Our painting service typically takes 3-4 weeks including delivery. Touch up kits are available to order. Colours shown are representative only. Please be aware that the appearance of RAL colours can vary depending on the absorbency level of the door face. Subject to terms and conditions.

Rebated Door Pairs

If you would like to fit a first-class door pair, we would recommend considering Rebated Meeting Stiles. Rebating means removing a section along the vertical edge of each door where they meet to allow them to fit snugly together, eliminating the small gap that you would see with square meeting stiles (two doors fitted side by side).

A number of door designs held within our stock ranges are suitable for rebating with a short lead time (see table below). This service is offered through our in-house joinery workshop. If your preferred door type is not listed, please check if our Bespoke Options service is available, as they could be made to order.

Doors that can be rebated into a pair from stock

Range	Door Designs
Urban Industrial	All door designs
Oak Contemporary	Tigris Oak & Medina (sizes: 686 & 762mm)
Oak Classic	Dove Pairs (ready rebated)

Colour Options Service (not suitable for smooth finish doors)

POCKET DOOR SYSTEMS

Clever, space saving solution that is easy to install.

A pocket door system that enables doors to slide conveniently into a wall cavity and save space whilst looking incredibly stylish.

Easy to install* with a rigid frame, our pocket door systems are supplied pre-assembled so that they can be fitted in half the time of other brands.

Available for both single and double door situations in a selection of sizes, almost all of JB Kind's internal doors are suitable for use as a pocket door. You can also choose from a selection of pocket door accessories too!

Key features:

- Easy to install* rigid frame, supplied pre-assembled
- Fitted in half the time of other brands
- Designed for stud and plasterboard
- Door is fitted after all installation and decoration has been completed, avoiding any potential damage to your door.
- Door choice can be changed in the future without structural alteration to the wall.
- Compatible sliding door hardware available
- Available in single and double format

*We always recommend using a professional fitter.

Pocket door cassette:

The cassette structure is made from 0.5mm galvanised steel, with the sides formed from single pieces of pressed steel which is corrugated for complete stability. Transverse ribs fixed to the corrugations further re-inforce the structure and allow fixing of plasterboard direct to the cassette. The internal pocket cavity is protected by a cover during installation.

Spacer bars:

Twin spacer bars are supplied that are fixed between the cassette and jamb during installation to ensure the structure remains square.

Specifications:

Suits door thickness 35mm with a maximum door weight 80Kg.

Double pocket door kit (shown as white primed)

Includes: 4 x cover moulds with brush seals and 2 x header covers

Code	White Primed
SGLWPRIAC	single pocket door kit
DBLWPRIAC	double pocket door kit

How to order a Pocket Door System: Your step by step guide

STEP 1

Single or Double Pocket Door System

Use our size guide tables to check your requirements. For a double pocket door, you will need to purchase two single pocket door systems and a double leaf conversion kit.

STEP 2

Choose your door design

The majority of our door designs are suitable for use as pocket doors. However, some doors that have raised mouldings and 44mm fire doors are not suitable. Please get in touch if you're in any doubt.

STEP 3

Timber accessory kits

You will need an accessory kit as the pocket door system cannot be installed without one. Choose from either white primed or varnished oak, available for both single and double options.

STEP 4

Door Grooving

The bottom edge of the door will need to be grooved to fit in the floor guide of a pocket system.

If required, our in-house joinery workshop can pre-groove your doors prior to delivery, for a small charge.

STEP 5

Optional accessories

Automatic Door Closer: is a self-closing system that enables the door to glide into place automatically after being opened.

Double simultaneous operator: enables a double pocket door to open and close simultaneously.

Soft-close damper unit: applies a brake making sure that the door moves slowly and smoothly to a close.

STEP 6

Door furniture

Choose from either a bathroom privacy lock or flush door pull.

STEP 7

Finding a JB Kind door supplier

Take a look at the Supplier Locator on our website or approved Online Partners.

Once you've chosen a place to purchase from, then just hand over all of your requirements and your doors and pocket systems should be with you in no time!

If you do have any questions, our expert JB Kind team is on hand to help you out, just call **01283 554197** or email info@jbkind.com

DOOR HANDLE PACKS

Door Handle Latch Packs are the perfect partner for your JB Kind doors

Enjoy the convenience of a stylish door handle latch pack, supplied with everything that you need to fit your door in one box. Each pack comes with a pair of handles, a latch, a keep and three quality ball bearing hinges.

Check out our chrome handle packs, as they come with a time saving SmartLatch. This innovative latch can be quickly installed in less than 5 minutes, saving tradesmen up to 25 minutes per door. This time-saving advantage is a real plus point, as less cutting out of the door is required.

Smartlatch: Fit in under five minutes

Step one: Using a 25mm drill bit, bore out to 75mm in depth.

Step two: Using the same bit, drill the hole for the spindle.

Step three: Then simply insert the latch.

Step four: Fit handles.

Essential Door Care & Maintenance Advice

The principal enemy of timber doors is excess exposure to moisture or dryness. Having left our custody, we have no control over the conditions to which they are subjected and to avoid any subsequent cause for disappointment, we strongly advise the following advice is heeded. If suitable care and treatment is not taken to prevent the free passage of moisture either into or out of the wooden door, stresses within timber may be released resulting in movement or distortions such as swelling, shrinking, warping, splitting, twisting or even discoloration. We are unable to accept any liability for any failings where they have arisen due to the free passage of moisture.

Storage

Upon receipt, check your doors carefully for condition and suitability, as claims made later may not be considered. Please store doors laid flat, fully supported off the floor with at least three full width bearers of the same dimension in a dry fully ventilated area, with protective packaging intact. Doors supplied unfinished should be thoroughly sealed on all faces and edges prior to the commencement of any joinery work, although first sizing them may be to advantage. We recommend that veneered doors are sealed using Manns Extra Tough Interior Varnish or Manns Door oil.

Wood finishes

There are numerous brands on the market and we fear many are formulated to achieve a low market price rather than quality. We have tested Manns Extra Tough Interior Varnish and Manns Door Oil which have produced excellent results. For this reason we strongly recommend the use of one of these two finishes to help protect the guarantee. Either of these two finishes will provide a lasting seal between component parts. Good quality solvent or acrylic finishes may be used, but check they are suitable for use with timber laminates or veneers. Follow the treatment manufacturer's instructions carefully and avoid over applying the treatment, particularly the first coat.

We recommend keeping a copy of the claims made for the product in the event it fails to perform. It is vital all finishing systems are applied equally to both sides and edges at the same time. Rapid changes in ambient moisture are extremely detrimental especially when unbalanced.

Natural oils such as Danish oil, tung oil and linseed oil are not suitable for use with any of our products. These solutions are penetrating oils and are not suitable for use with veneered doors. The application of a base coat stain or paint primer alone is not deemed to form a seal. Failures related to treatment will be assessed based on their application and the claims made by their manufacturer.

Installation

Check the door for suitability prior to commencing work. Claims made later may not be considered. When trimming doors, reduce them equally and not excessively from the top and bottom for height, to the hanging edge only for the width, if minimal, but equally with the meeting edge if a greater amount is necessary.

Recesses for hinges (3 No. 75mm internal, 3 No. 100mm external) and mortises for latch/locks etc. should be cut to the minimum recommended sizes. Panel door rail joints will be significantly weakened if mortises are located there. On completion remove doors, taking off all ironmongery and treat every cut/untreated surface liberally with a number of coats of an appropriate treatment before finally refitting. Remember to pay attention to all edges of your door, particularly any exposed end grain where the propensity for moisture is much greater.

Installation - Fire doors

When fitting our FD30 fire doors, please note that there are strict limitations about how much they can be trimmed and these must not be exceeded. Ironmongery used in the installation of fire doors must be strictly in accordance with the door's certification and appropriate for use with a fire door.

Internal door specific

We strongly advise against the installation of all types of timber doors into a building with recent plastered or screeded areas. Wet sites with enclosed unheated buildings represent extremely detrimental environments and must be thoroughly dry, without condensation, before doors are introduced. Even our pre-finished doors should not be exposed to inappropriate damp site conditions.

External door specific

Even in times past, it was never advisable or intended that timber entrance doors be fully

exposed to the worst elements of our climate, even if well coated. A South / South Westery elevation is the worst direction for the prevailing weather and exposure to the hottest sun which can seriously degrade external doors.

We recommend they are set back from the front face of the building or covered by a canopy or porch way projecting not less than about 1.5m, regardless of elevation. Always fit with a suitable weatherboard regardless of frame cill type fitted, to prevent droplets of moisture hanging from the door bottom.

Future maintenance is most important to retain good appearance over many years and we recommend washing down with warm water and detergent every two to three years and re-coating.

Quality standards

All external and internal doors are supplied in accordance with BS EN 942:2007 "Timber in Joinery General Classification of Timber Quality", BS 5278:1976/EN25:1975 "Doors measurement of Dimensions and of Defects of Squareness of Door Leaves" and BS EN 951:1999 "Door leaves. Method for measurement of height, width, thickness and squareness".

Any claims against warranty relating to manufacture will be assessed strictly in accordance with the criteria contained within.

Any claims against warranty relating to storage, handling or installation of any of our doors will be assessed against guidelines contained within BS8000 part 5:1990 and British Standard Code of Practice CP151. JB Kind Terms and Conditions of Trading apply.

Safety Glass

To comply with building regulations all our pre-glazed doors meet the requirements of the European standards.

IMPORTANT

Wood is a natural material and variations in colour and graining should be expected. Note: With door pairs we cannot guarantee an exact veneer match.

Colours depicted are representative only and are reproduced as accurately as the printing process will allow.

For a perfect finish...

Applying a quality finish to your internal doors ensures their long term appearance and performance.

We recommend the following finishing products that have been tested on our unfinished oak internal doors with excellent results.

Please refer to www.mannsuk.com for more information and to purchase these products directly.

All-in-one natural hard wax oil that dries to a natural, clear matt finish.

Clear, water based varnish that is available in 4 sheen levels.

EXTERNAL EXTREME

Tigris Glazed Extreme, shown painted

Our External Extreme door range has revolutionised the replacement front door market!

Constructed with an exceptionally durable and dimensionally stable top layer of MEDITE®TRICOYA®EXTREME and sealed with a factory applied paint finish, ensuring that the doors can withstand all weathers – and to illustrate just how confident we are, we issue every External Extreme door with a 10 year guarantee!

All External Extreme doors are:

- Weather resistant
- Supplied with a 10 year guarantee
- Suitable for fitting in a day!
- Supplied with a weather bar
- Perfect for over painting

Head to our website for more info
jbkind.com/products/external-doors

Traditionally used for cladding and facias, MEDITE®TRICOYA®EXTREME's hard-wearing and weather resistant properties make it perfect for use within the structure of external doors.

DURABLE
Longer lasting, perfect for external use.

SUSTAINABLY SOURCED
FSC® Certified. Wood used from sustainable sources.

LOWER MAINTENANCE COSTS
Extended periods between exterior coatings maintenance.

PERFECT FOR COATING
Improved stability and durability enhances service life of the coating. Damaged coating will not affect the core.

ENHANCED STABILITY
Swelling and shrinking dramatically reduced.

RESISTANT TO FUNGAL DECAY
Effective barrier to fungal decay.
